#### **About This Guide**

This guide was created to assist you install Cerebrum Nexus 2.6.0. This version of our software introduces many new features and primarily introduces a new security handshake between Cerebrum Nexus and LABdivus, and includes a bundled version of OpenJDK, negating the need for Oracle Java. We recommend that you use this guide to plan and execute the upgrade and contact Cerebrum Support with questions before or during the upgrade.

#### **Contacting Support**

Online: https://support.cerebrumcorp.com

Call: (855) 469-5467 Mon-Fri 7am-7pm

#### **Installation Guide**

- 1. Please make sure you are an administrator on the computer or can get administrative rights. You'll also need to be an admin on LABdivus (Lab Manager or Pathologist).
- 2. Click on Start and type in "add or remove" and the Add or Remove Programs Settings should appear. Click on it. Scroll down to Cerebrum Nexus and Uninstall

3. Download Cerebrum Nexus 2.6.0 from https://www.cerebrumcorp.com/download-nexus.

4. Double click on the downloaded file to start the installation. You'll be warned by Windows Smart Defender that the program is not recognized by Windows. Click "more info" and then run the program anyway.

| Windows protected your PC  | Windows protected your PC   |
|--|---|
| Microsoft Defender SmartScreen prevented an unrecognized app from<br>starting. Running this app might put your PC at risk.<br><u>More info</u> | Microsoft Defender SmartScreen prevented an unrecognized app from<br>starting.
